Forecast for Coal Production

1254. SHRI SURINDER KUMAR SINGLA :

DR. SHRIKANT RAMACHANDRA JICHKAR :

Will the Minister of COAL be pleased to state :

(a) what are the annual forecasts for coal production for the next five years in the country ;

(b) what is the annual percentage of growth in coal production in the country ;

(c) how does it compare with the growth in the past decade ; and

(d) what are the reasons for the increase or decrease in the production of coal ?

THE MINISTER OF STATE OF THE MINISTRY OF COAL (SHRI AJIT KUMAR PANJA): (a) The Planning Commission has fixed a production level of 253.50 M.T. to be achieved by the end of 1994-95. The Planning Commission has also indicated that production requirement is likely to grow during 8th Plan at an annual growth rate of 6.08%. The Planning Commission, while approving 8th Plan, has indicated a production level of 308 M.T. to be achieved by 96-97. No firm projections are available beyond 96-97. However, achievement of this production level would depend on adequate investments being made available for coal production.

(b) and (c) As against the annual growth of 6.3% in the decade preceding commencement of 8th Plan (1982-83 to 1991-92), annual growth of coal production during 8th Pan period has been envisaged as 6.08 per cent.

(d) Coal production has been constantly increasing over the years with varying rate of growth. At the time of formulation of annual Plans, the Planning Commission takes into account likely materialisation of demand, availability of alternate sources of energy and the production capacity build up, while fixing the annual target.
